

The Kyäni Story

Kyäni began with remarkable founding families who, from humble beginnings, achieved enormous success through hard work and innovation. The Hansens took a small petroleum company and turned it into one of the largest independent distributorships in the United States. Similarly, the Taylor family transformed three acres and a horse into one of the largest potato farming and cattle operations in Idaho. Today they use cutting-edge technology to enhance and expand their businesses.

The Founding Families were introduced to the remarkable power of two relatively unknown Superfoods - Wild Alaskan Blueberries and Wild Alaskan Sockeye Salmon. The Hansens and Taylors were impressed by the potency and extraordinary health benefits that these nutrients were able to provide. Harnessing the entrepreneurial power of network marketing, the Founders formed Kyäni to provide nutritional wellness and financial opportunity to millions around the world. Today, Kyäni continues to offer the most compelling nutritional supplements in the industry and the opportunity for Customers and Distributors to experience more health, more wealth, and more life.

The Molecule of Life

In 1998, three scientists were awarded the Nobel Prize in Physiology or Medicine for their work on Nitric Oxide. Now called "The Molecule of Life," Nitric Oxide has been shown to positively influence:

Blood Circulation

One of Nitric Oxide's most important qualities is the ability to expand the blood vessels, leading to improved circulation and heart health.

Inflammation

Nitric Oxide is a "signaling molecule" with anti-inflammatory effects.

Brain Function

Nitric Oxide is an essential chemical messenger, improving the storage of information and communication between neurons.

Digestion

Nitric Oxide helps with microcirculation, promoting blood flow and nutrient delivery throughout the body.

Sexual Function

Sexual Function - Nitric Oxide has been shown to naturally increase blood flow, which is essential to improved sexual libido, performance, and satisfaction.

"In my 25 years of research, I have never seen a molecule [like Nitric Oxide] that so pervasively influences normal and abnormal body functions."

Dr. Solomon Snyder

Director of Neuroscience, John Hopkins Medical School

9 Reasons to Take Kyäni Nitro™

- Promotes Increased Energy
- Encourages Blood Flow
- Helps Improve Circulation
- Helps Reduce Inflammation
- Encourages Heart Health
- Improves Sexual Function
- Supports Cognitive Function
- Sustains the Immune System
- Improves Nutrient Absorption

Kyäni

NITRO™

Enhance Production of
Nitric Oxide

www.kyani.net www.kyanscience.com

Nitro Xtreme

Built upon the foundation of Kyäni Nitro FX™, Kyäni Nitro Xtreme™ contains even more nitrate from the proprietary blend of Noni concentrate for increased Nitric Oxide (NO) production in the body. In addition, Nitro Xtreme™ contains CoQ10, Magnesium, Zinc, Chromium, and Niacin. Among many other benefits, these additional nutrients also boost the body's production of Nitric Oxide.

Kyäni Nitro Xtreme™ is specifically designed for the most demanding parts of your day. Whether you're an athlete, business professional, student, or busy parent, Nitro Xtreme is perfect for increased energy, physical stamina, and mental clarity.

A Powerful Formula

Based on the powerful formulation of Kyäni Nitro FX™, Kyäni Nitro Xtreme™ contains additional components to give your body an extra boost. Research shows that the combination of these five ingredients enhances the production of Nitric Oxide in the body and maximizes the body's potential to utilize it.

CoQ10

Coenzyme Q10 (CoQ10) is an anti-oxidant produced by the human body. It is required for the basic functioning of cells. CoQ10 helps generate up to 95 percent of the human body's energy. This molecule also promotes cardiovascular health and improved blood flow. CoQ10 levels are reported to decrease with age and chronic diseases.

Magnesium

Magnesium helps convert carbohydrates, protein, sugars, and fats into energy. It also supports muscle relaxation and contraction as well as nerve transmission. Some studies show that increased magnesium is one of the most effective ways to boost energy. The Journal of Nutrition reported that low magnesium levels take a significant toll on the body's energy supply.

Zinc

Essential to more than 300 enzymes in the body, zinc plays an important role in maintaining a healthy immune system, energy metabolism, protein synthesis, blood sugar balance, wound healing, and brain function.

Chromium

Chromium helps turn carbohydrates, proteins, and fats into energy. This essential mineral also helps the body regulate blood sugar levels, maintain heart health, improve the immune system, and encourage lean body mass.

Niacin (Vitamin B3)

Niacin is an anti-oxidant essential for cellular metabolism. It is involved in over 50 metabolic processes that turn carbohydrates and fats into energy. Niacin also helps maintain heart health, supports the digestive tract, and promotes a healthy nervous system.

Nitro FX

Kyäni Nitro FX™ is a proprietary blend of Noni concentrate that has been shown to increase the production of Nitric Oxide (NO). Also known as "The Molecule of Life," Nitric Oxide repairs, defends, and maintains every cell of the body. Studied extensively by researchers and physicians, Nitric Oxide has been touted as a powerful, healthpromoting molecule by tens of thousands of scientific papers.

Use Kyäni Nitro FX™ as needed throughout the day and start to Experience More.

"The body can last **5 minutes** without oxygen (O₂), but can only last **5 seconds** without Nitric Oxide (NO).

By generating more Nitric Oxide in the body, you achieve peak performance."

—Dr. Abbas Qutab, Head of Kyäni Medical and Scientific Advisory Board
